About me

Full Stack Developer and First-Class Honors graduate (4.0 GPA) with a passion for building scalable digital solutions. Experienced across the full software development lifecycle — from AI-powered web platforms using Anthropic Claude API and RAG to cross-platform desktop apps with Tauri 2, legal CRMs with PostgreSQL and Prisma, and employee monitoring systems with .NET 8 and Azure DevOps. Proven track record of delivering impactful products using Next.js, Supabase, BullMQ, AWS S3, Twilio, and enterprise integrations.

Experience

Full Stack Developer – TeamCollaboro

📍 *Aug 2025 – Present*

- Developing and maintaining scalable accounting web applications with modern frameworks.
- Implementing application integrations with **Xero Developer API, Quick Book, Free Agent** for accounting and business workflows.
- Building responsive user interfaces using **React.js (Vite) and Tailwind CSS**.
- Designing and managing backend services with **.NET Core Web API** and **MySQL** database.
- Team Leadership, Team Training, and Project Management — coordinating developers, conducting onboarding and knowledge-transfer sessions, and overseeing delivery timelines.
- Azure (WebApp, Static Web, Database, Cost Management)
- Building AI-powered learning platforms using **Anthropic Claude API** with RAG (Retrieval Augmented Generation), streaming responses, vector embeddings, and Supabase.
- Developing cross-platform desktop apps using **Tauri 2 + React + Vite** with screenshot capture, activity/network tracking, and auto-update capabilities.
- Designing systems with **PostgreSQL, Supabase, Prisma ORM, and BullMQ/Redis** for background job processing; integrating Twilio, Resend, AWS S3, and Microsoft Graph API.
- Managing **Azure DevOps** end-to-end: boards, backlogs, sprint planning, work item tracking, CI/CD pipelines, repos, and release management for the full team.

Phoenix Industries – IT Assistant

📍 *April 2024 – Aug 2025*

- Developed and maintained Web Application
- Front End implementation with React JS
- Active Directory (AD) user and object management
- Network setup, troubleshooting, and device configuration (PCs, printers, etc.)
- Vendor management for IT procurement and service delivery
- Administration of Sales Force Automation (SFA) and Microsoft Business Central
- Built and supported Microsoft Power Apps for business process automation

- **Project Highlight:**
    - Collaborated with reporting manager to handle the entire IT infrastructure setup during the company's relocation, including:
        - Budgeting and procurement of networking equipment
        - LAN/WAN and wireless infrastructure planning
        - Vendor coordination and deployment supervision

Phoenix Industries – Intern (IT Department)

📍 *Apr 2024 – Nov 2024*

- Gained practical exposure to enterprise IT systems and processes
- Assisted with network maintenance, device configurations, and user support
- Contributed to Power Apps solutions and mobile UI designs

Education

BSc (Hons) Computer Science and Software Engineering

University of Bedfordshire (via SLIIT)

🗓️ ***Jan 2024 – Jan 2025***

🎓 **Class: First Class Honors - GPA 4.0**

Higher Diploma in Information Technology

Sri Lanka Institute of Information Technology (SLIIT)

🗓️ ***2022 – 2024***

Project

- **Locate Dansel – Android App**
  Users can add and view Dansel locations.
  🔗 *Play Store Link:* Click Here
- **Flashlight – Flutter APP**
  Simple Flashlight application with SOS functionality
  🔗 *Play Store Link:* On Closed Testing Stage

- **Media Tracker – Flutter APP**
  User can track favorite books and Films, implemented with IMDB API and Google Books API
  🔗 *Play Store Link:* On Closed Testing Stage

- **SL Bus Tracker – Android App** *(Group Leader & Full Stack Developer)*
  Live public bus tracking system using Google API and Firebase.
  🔧 *Technologies:* Java, Firebase, Figma, Google Maps API

- **Tomato Game – Android App**
  Math-based quiz game with randomly generated questions.
  🔧 *Technologies:* Java, Firebase, API, Figma
- **Go Cart – Final Year Research Project**
  AI-powered grocery ordering mobile app with price prediction and shop comparison.
  🔧 *Technologies:* Java, Firebase, Python (ML), Figma
- **K-Tech – E-commerce Website**
  Online store for a computer shop.
  🔧 *Technologies:* HTML, CSS, JavaScript, MySQL, Figma
- **Lanka Hardware Hub – Group Project** *(Frontend Developer)*
  E-commerce platform with web and mobile applications.
  🔧 *Technologies:* React JS, Node JS, React Native, Firebase

- **E-commerce WordPress Site**
  Online clothing store built using WordPress and WooCommerce.
- **TeamCollaboro – Company Website**
  Corporate website for TeamCollaboro, a software company delivering SaaS and AI-powered business solutions.
  Technologies: Next.js, Tailwind CSS, TypeScript
  🔗 www.teamcollaboro.com
- **TeamPulse – Employee Monitoring System** *(Full Stack Developer & Team Lead)*
  Cross-platform desktop app (Tauri 2 + React) for employee time tracking, screenshot capture, and activity monitoring; backed by a .NET 8 Web API and Next.js admin portal. CI/CD managed via Azure DevOps Pipelines.
  Technologies: Tauri 2, React, Vite, Next.js, .NET 8 Web API, Supabase, PostgreSQL, Dapper, Azure DevOps, JWT, Recharts
  🔗 teampulse.digital
- **GenAI-BPO – UK AI Accounting Learning Platform** *(Full Stack Developer)*
  AI-powered e-learning platform for UK accounting professionals, featuring a Socratic AI tutor (Claude), RAG over course content, quiz generation, token usage tracking, and Supabase-backed progress analytics.
  Technologies: Next.js, TypeScript, Anthropic Claude API, RAG, Vector Embeddings, Supabase, Tailwind CSS
- **LexFlow – Legal CRM & Case Management** *(Full Stack Developer)*
  Full-featured legal CRM with contact pipeline management, matter tracking, document handling (AWS S3), automated SMS/email communications via Twilio and Resend, and background job processing with BullMQ and Redis.
  Technologies: Next.js, TypeScript, PostgreSQL, Prisma ORM, NextAuth.js, BullMQ, Redis, AWS S3, Twilio, Resend, Radix UI, Zod
- **Fintelli – Accounting & Partner Management Platform** *(Full Stack Developer)*
  Accounting and partner management platform with Xero API integration, anomaly detection, 2FA (OTP + QR code), JWT authentication, email notifications, and Microsoft Graph/Azure identity. Frontend built with React + Vite; backend with .NET 8 Web API and SQL Server.
  Technologies: React, Vite, Tailwind CSS, Ant Design, .NET 8 Web API, SQL Server, Dapper, JWT, Xero API, Microsoft Graph, MailKit, Swagger
  🔗 fintelli.tech

Tech Skills

- **Programming:** Java, JavaScript, Typescript, C#,C++ HTML, CSS
- **Frameworks:** React JS + Vite, Next JS, ASP.NET (.NET 8 Web API), Tauri 2, Node.js, Tailwind CSS, Dapper, React Hook Form, Zod, TanStack Query, Flutter
- **Databases:** MySQL, PostgreSQL, Supabase, Redis, Firebase
- **DevOps & Cloud:** GitHub Actions, Azure DevOps (Boards, Pipelines, Repos, Releases), Azure (WebApp, Static Web, Database), AWS S3
- **Tools:** Figma, Visual Studio, Android Studio, Cursor, Jira, Sonar Cloud, Swagger/OpenAPI, Recharts
- **Hosting:** Vercel, Monsterasp
- **Other:** OOP, DSA, Agile Scrum, Team Leadership, Team Training, Project Management, JWT Authentication, REST APIs, Swagger/OpenAPI
- **AI & APIs:** Anthropic Claude API, RAG (Retrieval Augmented Generation), Vector Embeddings, AI Streaming, Twilio, Resend, Microsoft Graph API, Xero API, QuickBooks API

Soft Skills

- **Leadership & Teamwork:** Team Leadership, Team Training & Mentoring, Cross-functional Collaboration, Stakeholder Communication
- **Project Management:** Sprint Planning, Task Prioritisation, Deadline Management, Risk Identification, Agile & Scrum
- **Problem Solving:** Analytical Thinking, Debugging & Troubleshooting, Adaptability, Attention to Detail
- **Communication:** Client Communication, Technical Documentation, Code Review, Knowledge Sharing

Certifications

- **C# .NET with MS SQL – Complete Beginner to Master** *(Udemy)*
